Note: This "login" system is contradictory with popular site "login" systems like Google,Youtube, Daraz, Facebook.

Bug: 03
Title/Summary: <mark style="background-color:red">Mobile Number Slot Issue- Text Message Not Being Accepted</mark>

Project List or Board: User Registration

Task Body:

Steps To Reproduce:

Open the create account form. Go to the Link : http://192.168.68.139:5000/signup
Input a invalid mobile number like any text in the designated slot.

Expected Result:
<mark>The mobile number slot should only accept numeric inputs and prevent the entry of non-numeric characters.</mark>

Actual Result:
<mark>Non-numeric characters (such as letters, symbols) can be entered into the mobile number slot, contrary to the expected behavior.</mark>

Bug: 05
Title/Summary: <mark>Sign-up Form - Accepting Duplicate Company Names Issue</mark>

Project List or Board: User Registration
Task Body:

Steps To Reproduce:

Access the user sign-up form. Go to the Link: http://192.168.68.139:5000/signup
Input an existing company name already registered within the system. Submit the form.
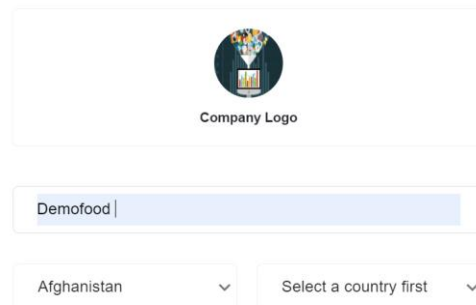

**Expected Result:**
<mark>The sign-up form should reject the entry of a company name if it already exists in the system, prompting the user with an error message.</mark>
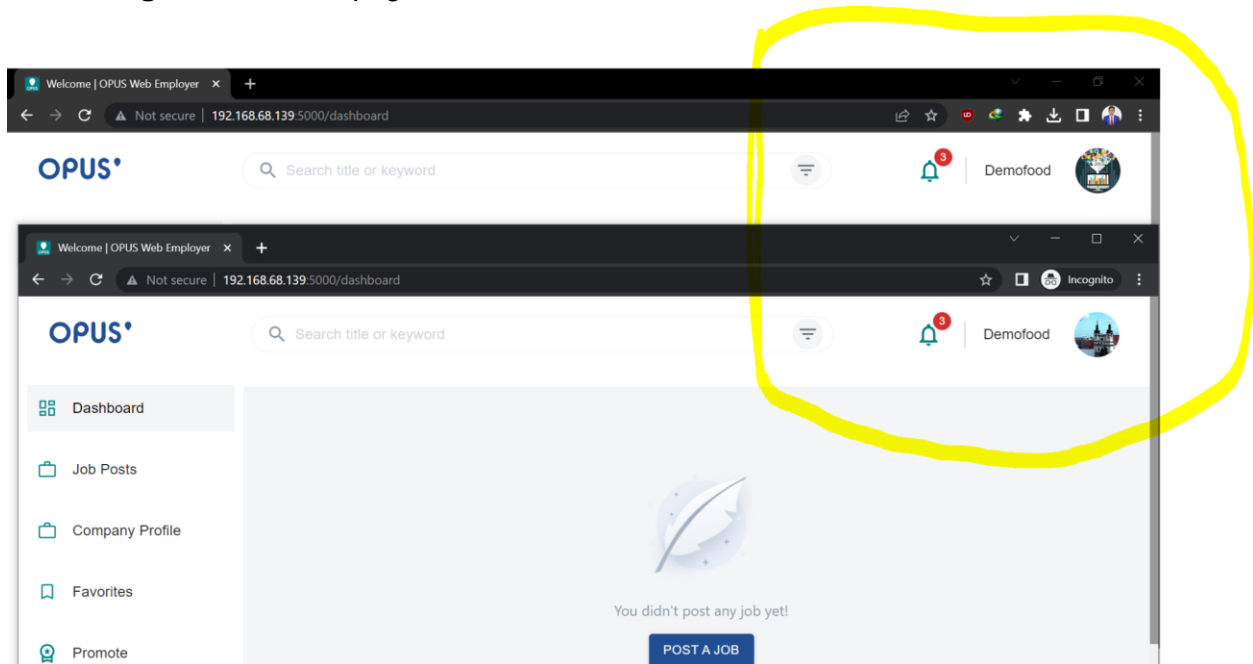

Actual Result:
<mark>The sign-up form allows submission with a company name that is already present in the system, permitting the registration of duplicate company names.</mark>

Bug : 07
Title/Summary: <mark style="background-color:red">Invalid Symbol in Expiration Date Slot - Job Posting Option</mark>

Project List or Board: Job Posting Management

Task Body:

Issue Description:
When attempting to input the expiration date for a job posting, an invalid symbol is being displayed in the expiration date slot.

Steps To Reproduce:

Log in to the job posting management system.
Go to link: http://192.168.68.139:5000/add-job
Create or edit a job post.
Navigate to the expiration date field and attempt to input a date.

Expected Result:
<mark>The expiration date field should accept valid date entries without displaying any invalid symbols.</mark>

Actual Result:
<mark>An unexpected symbol is displayed in the expiration date field.</mark>
